iFLEXTUBE DIFF SV DYNAMIC WHITE

The iFLEXTUBE DIFF SV DYNAMIC WHITE dual color that can emit tunable white light with temperatures ranging between 2700K to 5000K. The increased cross-section of 12 by 22mm provides the ability to incorporate more powerful LED chips which in effect provide significantly higher lumen output. Bending in the vertical plane allows the Neon to conform to concave and convex surfaces with ease. Light diffusion is done without compromise, eliminating any signs of spotting. High performance silicon offers UV and water ingress protection. Available in spools of 2 meter. The optional 5 meter length is the maximum length for a single spool.
